DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 26-30, drawn to a micro-fluidic assembly, classified in class 422, subclass 102.
 - II. Claims 22--25, drawn to a method of assembling a micro-fluidic apparatus, classified in class 156, subclass 349.
 - III. Claim 31, drawn to a method of making a fluidic seal, classified in class 264, subclass 138.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (II, III) and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the methods can be employed for making and assembling various devices, for example, not having internal channels.
3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1743

the instant case the method of assembling the micro-fluidic apparatus involves steps and end results different from the steps and end results of making a seal.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Vincent Gustafson on 04/24/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
